

## The Eazi Lifter Features & Benefits

### **DESIGNED AS A SAFE SYSTEM OF WORK**

The idea was developed as a way of lifting window product to height safely and quickly, helping you to conform to the “Work at Height and Manual Handling Regulations” without compromising productivity. This gives you a win – win situation with the legislators, your employees and your company

### **SMALL**

Only the size of a small golf bag means it's easy for you to carry from job to job

### **COMPACT**

You can transport it easily as everything is carried in a single case

### **PORTABLE**

Being hand operated you do not need for a power source making it convenient to use

### **LIGHTWEIGHT**

At only 22lbs/11kgs it is light enough to be carried in one hand

### **HIGH LIFTING RANGE**

You can lift up to four stories with a lifting height of 50ft / 15 metres.  
We can go higher upon request

### **VERY STRONG**

Lifts up to 275lbs/125kgs – which is five times more than you are permitted to lift unaided

### **PEACE OF MIND**

Proof tested to twice the SWL, every product individually tested to 110% SWL giving you peace of mind regarding safety standards

### **SIMPLE INSTALLATION**

Save time with assembly and fitting into the opening in less than a couple of minutes

### **SPEEDY OPERATION**

You can attach and lift the product into place easily and quickly saving you effort and time

### **OPERATED FROM INSIDE**

Gives protection from falls from height because you are working from inside the building

### **SAFE WHILST FIXING**

Holds the window secure in the opening whilst fixing allowing you both hands free to work

### **SPRUNG LOADED HEAD**

Ensuring constant pressure to the head plate under load for extra safety and simple to fit and remove the hoist with no load for trouble free working

### **REVERSIBLE HEAD AND BASE PLATES**

Using rubber pads one side and spikes on the other it suits various reveal types with versatility

### **PIVOTABLE BODY**

Enabling you to transfer product without difficulty from out to inside the building and vice versa

### **ERGONOMICALLY DESIGNED**

Winch handle and tensioning screw ring have been designed with you in mind positioned low down for easy operation

### **FITTED WITH A BRAKED WINCH**

Provides safe holding of the load when the handle is released to enhance your safety

### **TWIN HANDLE POSITION**

When you need help with heavy loads *(or quick rotation for light loads)*

### **FITTED WITH DYNEEMA SYNTHETIC ROPES**

Stronger and lighter than steel providing increased lifting capacity

### **PULLEYS FITTED WITH BALL BEARINGS**

You have less exertion when using the winch handle through reduced friction

### **PIVOTING HEAD AND BASEPLATES**

Adaptable accessory to suit floor installation when no reveal is present giving you the opportunity to still benefit from the Eazi Lifter

### **EXTENDING TUBES**

Another adaptable accessory to increase the height range for tall windows or doors increasing flexibility

### **ROTARY HEAD ADAPTOR**

When you are faced with raked head openings you can use this adapter accessory under the head plate to your advantage allowing fitting to the angle of the opening

### **PROVIDED WITH RAM KEYS AND ROPES**

Enables you to adjust the ropes to a variety of widths through the ram keys (rope adjusting mechanism) with simplicity and ease

### **PROVIDED WITH GUIDE TAPES**

Lets you to manoeuvre the product with little effort in difficult locations and over obstacles

### **PROVIDED CARRY CASE**

Protects the equipment from damage and keeps everything in one place

### **VACUUM LIFTER BRACKETS**

Adapts vacuum lifters for attachment to the hoist rope whilst providing easy detachment for safe storage in their cases when not in use

### **ROBUST**

Made mainly from stainless steel the Eazi Lifter will give you a long service life

### **VERSATILE**

Can be adapted for most known window installation

### **USER FRIENDLY**

Easy to get up and running with the instruction manual provided

### **LIFETIME WARRANTY**

The Eazi Lifter carries a lifetime warranty to the original purchaser when the "Annual Thorough Examination" service schedule is observed

### **MANUFACTURED TO APPROVED STANDARDS**

The design and manufacture is strictly controlled to the approved standards laid down by British and American standards and conforms to CE marking criteria. This way you can be reassured of the highest performance and quality of the Eazi Lifter

### **GREEN CREDENTIALS**

By using mainly polished stainless steel we avoid the chemicals used in other protective coatings and it is easily recycled upon disposal helping to reduce the impact upon the environment
